Subject: Air Dispersion Modeling Question - EPA - Texas and Louisiana Facilities
Attachments: region-6-risk-assessment-of-ethylene-oxide-emitting-facilities-July 2021.pdf

Kelly,

I was reviewing the attached document.

If possible, could you or one of the risk modelers send me the modeling input file that was used for the RY2018 for our St. Charles, LA facility?

I just wanted to confirm the annual emission rates for some of the emission points included in the modeling input.

I could not find the RY2018 NEI files, so my apologies if I have overlooked these.

Thanks for any assistance you can provide.

Regards,
